[www.tbinc.net](http://www.tbinc.net)

Building dreams for over  
30 years.

*A guide to planning and creating spaces in your home*

CUSTOM

*Our excellent customer service is only outdone by our product.*

## Our History

Owned and operated by Troy Bednarz, Lakeside Cabinets and Woodworking has been satisfying our clients since 1988. With over 150 years of combined experience Lakeside Cabinets has excelled at producing the highest quality products, customer service and the most experienced and professional staff available. Our facilities have over 9,000 sq/ft available, which houses our showroom, complete manufacturing and production area, and our storage facility. Our facility in Nowthen, Minnesota has been growing since the very beginning, with our state of the art machinery and our expert design team, we can give our clients the highest quality products imaginable.

## Who We Are

We are a team of dedicated professionals, working together, to ensure our clients experience the best service and highest quality products. We are here for our clients from the initial phone call, through the lifetime of their cabinets. We have been building cabinets since 1988 and we stand behind our work. We offer 100% custom cabinetry built specifically for you and your lifestyle. You will see the love and attention to detail that our very talented and experienced staff offers through the custom work we provide.

# Difference

## What makes us different?

### Women Centric Approach

Being the only Women Centric Cabinet Builder and designer in Minnesota, we understand that building or remodeling a home can be stressful. Women make a lot of the decisions when it comes to the planning and building of the home. That is why we utilize the Women Centric Approach for your cabinet design. To learn more visit our Women Centric page!

### VALUE

We have relationships, not "vendors". Working with our partners throughout the years has gained us strong, reliable relationships. This is a savings and trust that we have the honor to pass on to our clients. We associate with selective businesses that display the same amount of care, craftsmanship and pride that we ourselves, strive for.

### DESIGN

Before we build or design your cabinets, we listen. Expanding on all your wants and needs, *listening* is crucial to creating thoughtful and well executed designs that offer you more than just cabinets. But custom solutions that are built to accommodate your lifestyle!

### INTEGRITY

Through an extensive review process, Lakeside Cabinets and Woodworking has been chosen as a finalist for the BBB Integrity Award. Honesty and Integrity are the base of our foundation that we build every relationship upon. We have an A+ rating with the BBB. Visit our Awards page to learn more!

### REVIEWS

We have received a lot of unsolicited reviews from our clients. Reviews are wonderful in any form, but they are more meaningful when they come from clients without promotion. See our testimonial page to hear what people say about us!

# Our Process

Using the state of the art technology and machinery, our expert staff will produce the highest quality cabinets designed to fit, not only your style and budget, but will also be custom designed to accommodate your lifestyle.

When you first walk into Lakeside Cabinets, you will sit down with your own personal cabinet designer who will take the time to discuss and understand your project, budget, style, time-frame, organizational needs and even materials you wish to use. During your visit, you will experience our showroom. You can look, feel and discuss various options that you may want to include in your design. Getting to know you is critical to us. This is how we can ensure your cabinets will serve you for years to come!

Your individual designer will work very closely with you, to ensure the finished product matches your overall vision for your home and or space. After your initial visit, your designer will visit your home, take measurements, draft perspectives, create elevations and a floor plan for your project.

These preliminary drafts will be applied to our 3D rendering program, that you can monitor throughout the entire process.

## **1. Preliminary Information:**

Call or stop in to schedule a design consult so we can collect the scope information for your project. We will create a project file for your home that has the preliminary information such as: Your name, phone number, email address, physical address, the scope of your project, measurements and more!

## **2. Measurements:**

To speed up the estimation process, provide us with *rough* measurements of your space. If you are unsure what to measure, you can use our handy Measuring Packet to help you. Or based on your project, simply request a designer to schedule a time to visit your home and they will gladly complete the measurements for you!

## **3. 3D Renderings:**

Included in our free layout process, we will complete 3D renderings for your review. If this rendering is similar to what you have envisioned for your project we will submit this information to complete an estimate for your reference.

## **4. Estimate:**

After you approve your 3D renderings we will complete an estimate for your reference. We will detail several options in our estimate that you can include or remove, allowing you to determine what is important for you and your project. Want to install or finish your self? No problem!

## **5. Consultation and Final Measure:**

Once you approve your estimate and are ready to begin refining your design, we will schedule a time to meet with you to finalize your drawing and design, discuss specific style details, other options and accessories that you may want to add to you project, and give you detailed drawings and measurements. To do this we require 10% of your proposed estimate.

## **6. Down Payment:**

To ensure your project is put into our production schedule, we will require a down payment of half of your estimate to be submitted, by either cash or check (no credit cards accepted).

## **7. Production:**

Depending on the scale of your project and when your down payment is received, project lead times may vary. However no matter how large or small your project, it will be scheduled in the order it was received and finalized.

## **8. Finishing and Install:**

If you have selected to have us finish and or install your project we will complete this either at our facilities or on site depending on the specifications and or project.

## **9. Happily Ever After:**

Rarely do you hear that term! However, we gladly and proudly stand behind our products and woodworking for as long as you own them!

# Start Here

step  
01

## Dream

Every project stems from your dreams! Our designers will help you capture your dream. They are trained to relate your plans to your lifestyle to the function and style of your cabinets!

step  
03

## Decide

Now that your plan and layout have been created, it is time to make selections! What color? What Accessories? No wrong answers, just answers that best suit you!

step  
02

## Design

Once our designers help you capture your dream, they will begin constructing a plan and a layout!

step  
04

## Deliver

Once you have made and finalized your selections and plans, we will help you and give you the support you need after your cabinets have completed production!

# Dream

step  
01

Inspiration can come from anywhere! Once you have a goal in mind get ready to collect information, formulate and determine your style. Your personal cabinet designer will be able to help form your overall vision for your space.

# Design

step  
02

Once you have your dream organized, its time to discuss your plans with your cabinets designer. Your individual cabinet design will be able to help you capture your dream and apply it to your space, lifestyle and style choices.

With a well thought out, executed plan your space will operate efficiently and with style.

**Helpful Hint!**  
Begin constructing a "His or Her" list to ensure the most important features don't get missed!

# Decide

step  
03

Select and make the choices that will make your space! Choose your preferences, and add options and details that will make your space efficient and work for you. Not the other way around!

Custom cabinets give you the benefits to selecting and choosing options that ensure that your cabinets will be ideal for your lifestyle!

1. Wood Species and Material
2. Door and Drawers Profiles
3. Drawer Box Construction
4. Drawer Slides
5. Door Hinges
6. Cabinet Interior / Cabinet Back
7. Decorative Glass Options
8. Cabinet Finishes
9. Cabinet Accessories
10. Molding and Mill work
11. Cabinet Hardware
12. Delivery and Install

# Wood Selection

One of your first choices will be selecting a wood Species. Each wood type offers a unique grain variation, and can have a dramatically different look when color is applied. It is critical to understand the differences and to find one that has the features and style that fits your style preference.

## Cherry

Light pinkish brown. With a fine to uniform gain, cherry is Moderately hard and heavy.

**Expect variations.**

## Maple

Cream color. A popular choice featuring a fine, uniform grain pattern.

**Very Consistent.**

## Walnut

Color can range from dark brown to light pale. Straight, irregular large grain patterns.

**Expect Variations.**

## Hickory

Light to medium brown. We offer calico and rustic hickory. Straight with some curved grains.

**Expect Variations.**

## Alder

Light tan to reddish brown. We offer rustic and clear Alder. Fine even grain. Knots vary.

**Expect Variations.**

## White Oak

Light to medium brown. Grain is straight and curved. Coarse uneven texture.

**Expect Variations.**

## Red Oak

Light to medium brown with reddish cast. Straight curved grain. Coarse Uneven texture.

**Expect Variations.**

## Quartersawn Red Oak

Grain pattern more Vertically Orientated than common oak. Coarse even grain.

**Very Consistent.**

## Quartersawn White Oak

Grain pattern more Vertically Orientated than common oak. Coarse even grain.

**Very Consistent.**

## Poplar

Light cream to yellowish brown. Straight, uniform grain with medium texture.

**Very Consistent**

## MDF / Paint Grade

Medium Density Fiber board is an engineered wood product that is preferred for enameled or painted cabinets doors. Dense and heavy this product is the superior choice for paint. Offers amazing benefits.

**Very Consistent.**

More wood options available!  
Request your wood with a designer!

# Wood

# Door and Drawer profiles

When choosing a look for your cabinets, the kind of door style you choose will play a significant role in the overall look of your room. Create a distinctive look by mixing and matching profiles to make a focal point. Or create continuity with one profile option to give your space a clean, efficient feel.

## Center Panel Profile Options

## Inside Profile Options

## Outside Profile Options

# Door and Drawer Style

step  
03

Add style with shape, style accents or glass.

## Additional Options

### Add Shape

Select the shape of your cabinet doors. The selection you make will drastically change the style of your room.

#### Square.

Panels that have right angles on all sides. Clean straight and classical.

#### Roman Arch.

The top panel is curved offering an architectural element and design.

#### Cathedral Arch.

The top panel is curved and has a slight radius in the top corners.

### Add style

With a variety of styles and choices to select from, customize your doors with decorative features! Add a bead board panel or a mullion to your doors to add a different look. Mix and match styles to create a one of a kind look!

# Drawer Boxes

step  
03

We offer 6 different drawer box options for you to choose from. To help guide you through which drawer construction is best for you, we have put together this handy guide to explain the differences between them. You may also visit our show room to experience each one for yourself!

## Solid Dovetail Drawer Box

This drawer is the top of the line. A Solid Wood Dovetail Box is created out of solid wood that is connected at each corner by the Dovetail Joint. This option will last a lifetime.

## Finger Jointed Dovetail

Finger Jointed Dovetail Drawer Boxes are created from small pieces of wood fingers jointed together to form a box. Dovetail joints support all four corners in this option and give an economical way to have a luxury drawer. This option is economical way to achieve the dovetail feature that will last a lifetime.

## 5/8" Solid Drawer Box

Our solid wood drawer box offers a 5/8" sides with 1/4" bottom dadoed in for strength. This option offers a nice wood grain drawer that is easy to clean and maintain.

Select different drawers boxes for different rooms to maximize efficiency or to add style!

**BEST  
VALUE!**

## UV Baked Drawer Box

Lightweight and durable, this box comes pre-finished in 4 x 8 sheets. They are then cut out by our CNC and assembled in the shop. The UV finish adds added protection from the everyday elements your cabinet drawers may face (water drops, stains, etc.).

## 1/2" Melamine Drawer Box

This option provides a box that has 1/2" sides with a 5/8" bottom that is dadoed in for strength. This options provides a nice clean look that is easy to maintain.

## Zargen Drawers Box

The White Zargen Drawers are our baseline option. This drawer is offered in a variety of depths, have an easy to clean white melamine bottom, back and powder coated metal sides with Zargen slides.

# Drawer Slides

step  
03

We offer 3 different drawer slides. Read about each one to determine what one is the best fit for your and your needs. Select different slides for different areas of your house, to ensure maximum efficiency and use!

## Zargen Drawer Slides

This is our base line option for drawer slides. The powder metal coated side, construct the drawer box slide and offer an efficient and clean motion to only the Zargen Drawer Box.

### Drawer Box Options:

Only Zargen Box

## Side Mount Full Extension Slides

Premium ball bearing slides that offer a full extension motion. These slides are mounted on the side of the drawer box you wish to select!

### Drawer Box Options:

All  
(Except Zargen)

## Undermount Slides

Our top of the line slides are discrete and offer superior slide motions. This option also offers a soft close feature to any drawer box you wish to select.

### Drawer Box Options:

All  
(Except Zargen)

**Soft close  
feature!**

# Slides

# Door Hinges

step  
03

We offer 2 different door hinges for our cabinets, each providing superior motion and adjusting. Read about the benefits of both to determine what is the best fit for your space!

## Vitus 110 European Hinge

We offer a fully adjustable European Hidden Hinge for our baseline selection. Durable and discrete, your cabinets will move and function smoothly for years to come!

**soft close  
feature!**

### Soft Close Feature Options!

The Grass Unisoft Soft Close adapter can be added to any hinge selection. This adjustable adapter screws into the face frame to offer a soft close feature to any door!

## Nexis 110 European Hinge

Our upgraded European Hidden Hinge offers superior durability, maximum adjusting and the smoothest motion available. Constructed from high quality metals, this hinge also has a soft close feature.

**soft close  
feature!**

### Soft Close Feature Options!

For our upgraded Nexis hinge you can select either option. However the Nexis Clip On Soft Close Adapter is quickly added or removed to offer a fully adjustable, sensitive soft close feature to any door!

## Cabinet Interior

Our baseline interior finish is a durable, clean and efficient white melamine. We do offer Decorative finishes for a melamine interior as an upgrade in a variety of finishes and colors.

**White  
Melamine**

Our baseline  
Interior is clean,  
durable and  
efficient.

**Hard Rock  
Maple  
Melamine**

**London Grey  
Melamine**

**Black  
Melamine**

**Windsor  
Mahogany  
Melamine**

**Rustic Alder  
Melamine**

**Black Walnut  
Melamine**

**Almond  
Melamine**

## Cabinet Backs

With our superior construction, our cabinets do not require or need finished backs. Our cabinets are structurally sound without the need or support of a cabinet back. However we offer backs as an upgrade per request and for decorative and aesthetic reasons.

### Cabinets without back construction.

*Unless your cabinet design details glass doors or open shelving(wine rack).*

### Upgrade with backs.

*Upgrades for aesthetic reasons. Such as glass doors or finished interior cabinets.*

## Decorative Glass

Add a special flare and stylish look to your custom cabinets with decorative glass of your choosing. Stop in to our show room to see these and more options!

Pick trim for your cabinets, dress them up or down how you prefer. Add drama with an oversized ornate crown or a simple straight edge to establish your style!

## Cabinet Finish

To ensure that you receive the cabinets of your dreams, Lakeside will coordinate the finish options and processing for you. With several finish options available here are some terms and techniques that will help you make the choice!

### Stain

A variety of mixtures, stain is applied to natural wood to achieve a certain color.

### Enamel

An opaque color option for MDF or wood to achieve a bold color.

### Glazing

A semi-transparent color can be rubbed or applied to a stained or enameled finish.

### Pickling

A semi-transparent white stain that is applied to wood to add a white appearance that will accent natural wood features.

### Distressing

Distressing adds an aged or a rough texture to your cabinets, by the use of roughing edges, hole stamps and more.

### Distressing / Glaze

To accent and make distressing textures more apparent, glazing can be applied to add more contrast.

### Distressing / Burns

Burns are added after stain or enamel to add a highlight or contrast. This offers a vintage or rustic flair.

# Cabinet Accessories

step  
03

We build your cabinets to accommodate your life and style choice. This means utilizing every inch of your space to offer custom organizational solutions that will offer you an efficient and beautiful space. Our designers are experts at offering you ideas and options that will create ease and comfort to any space.

Silverware Organization, Lazy Susans, Mixer Lifts, Pull-Out Pantries, Closet Organization, Pull-Out Hampers, Spice Racks and much more, are available for any space you have in you home! Visit our showroom to see and experience these options in person.

# Cabinet Hardware

step  
03

We have two hardware programs that will help keep you on budget and to eliminate your run around. We offer both decorative cabinet hardware and bathroom accessory hardware. With several options to choose from, our hardware specialist will walk you through the selections, finishes, sizes and more!

## Our "Decorative Hardware Program"

is designed to make your hardware selection easy, while assuring your selection falls within your cabinet allowance. We have hand selected a variety of handles and knobs that will fall within our Baseline Hardware Allowance. Our hardware allowance covers the cost of the hardware, drilling, shipping, receiving and installation. Visit our website or our showroom to view our selection!

### Hardware Tip!

Select different hardware for different rooms to create a one of a kind look.

## Our Bathroom Hardware Packages"

With several bathroom products to choose from, we have selected some key items that no bathroom should function without. Delivered to you with your new custom cabinets, you will never have to worry about shipping costs or driving to the hardware store. Expanding the comfort of your space is easy with our online selection process and package pricing that will beat the big box stores.

Our Hardware must be selected and confirmed two weeks prior to delivery to ensure drilling and delivery of hardware. If selection(s) are made after we will provide jigs for you to drill your cabinets on site.

## Hardware Selection:

### **Baseline Cabinet Hardware Selection Process** *(included in allowance):*

At the initial cabinet design meeting we will introduce you to our “Decorative Hardware Program”. The program is designed to make hardware selections easy while assuring your selection falls within your cabinet allowance, we have negotiated special pricing with our Vendors.

Baseline selection process includes up to 3 different hardware selections throughout your home. You may select to have additional pieces for your home at an additional cost.

### **Customized Cabinet Hardware Selection Process** *(available at an additional cost):*

Call us to set up an appointment at our office or visit the following web-sites

- o Amerock.com
- o Berensonhardware.com
- o Libertyhardware.com
- o Hickoryhardware.com

## Hardware Installation:

### **Baseline Drill Locations For Cabinet Hardware** *(included in allowance):*

The allowance accommodates one piece of hardware per door/drawer.

#### **Door Drill Locations:** For Knobs and or Pulls

- Upper Doors : Drilled and placed 2 inches from the bottom of the door
- Base Doors: Drilled and placed 2 inches from the top of the door

#### **Drawer Drill Locations:** For Knobs and or Pulls

- Drilled and placed in the center on slab style drawer face.
- All Dovetail drawers boxes are drilled in the center of the drawer face.
- Drilled and placed in the center on the top rail of panel drawers and rollout garbage units.
- Handles are typically 3 inches or 96mm on center.

### **Customized Installation for Cabinet Hardware** *(available at an additional cost):*

- Upon request, before production, we can place more than one handle per door/drawer.
- Upon request, before production, we can drill and place hardware in any location you choose.
- Post production change requests will require additional costs.

**Hardware Tip!**  
Keep in mind the  
Finishes of your  
Fixtures, faucets and  
Appliances when  
Selecting.

# Decorative Accents

step  
03

Add accents to your home to create unique touches that will bring your room or space to life! With several different styles and options available to accent your home, speak with your designer to select the perfect option!

## Corbels

## Feet

## Posts

Half posts also  
available to add to  
your cabinets for  
additional style!

# Finish. Deliver. Installation.

step  
04

To better serve you Lakeside Cabinets and Woodworking can coordinate the finish, delivery and installation of your new custom cabinets. We utilize and cultivate our working relationships to ensure the best service, pricing and quality available.

## You will receive a final design packet to review and approve before production.

- Confirm you have everything you need for your project to go smoothly. Have you ordered countertops? Appliances? Lighting? Flooring? Coordinating these visits and appointments will help your project to avoid any hiccups
- When reviewing your plans, remember, people often regret not having accessories or special features. Do you have a pull out trash can? A silverware tray insert?

## Before delivery you will be in charge of preparing your home for construction. It is almost time!

- Coordinate with your contractor to ensure your home is well prepared. Clear a path for your new cabinets. Make sure walls, electrical, plumbing work are all completed.
- Your home will be busy with people visiting regularly. Ensure that your little ones, pets and family have a safe place to play. Dust and debris may occur. Protect your personal items by having them in designated areas.

## Your cabinets delivered and installed.

- Installation could take a few days or maybe longer depending on the complexity of your project.
- Prepare your project area. If a Kitchen, consider you will be without that space for a period of time. Where will you eat? Where will you wash dishes? Where will you relocate appliances like your Fridge.
- Installation requires a skilled craftsman to ensure your design and project properly fits your space. Occasionally, things happen. Between your installer's skills and our rapid replacement parts process, you can breathe easy if something does occur!
- Once installed, your project may require touch ups or final adjustments. This is common and we will gladly be there to complete this. Now sit back and enjoy complete satisfaction of your new space.

## Built to last.

- Our cabinets are built and engineered to last a lifetime. For as long as you own your cabinets you can feel at ease that your investment will return our investment into you. Our cabinets have a limited lifetime warranty. Sit back and relax.

# Welcome to the Lakeside Family.

# Your dreams. Our passion.

## Expectations.

We will design and layout your project with the information we gathered on your dream project. In some cases we may have to visit your home based on the size of your project. We will then supply you with 3-D renderings of your project. Here at Lakeside Cabinets we like to earn your trust so all of this is done for free.

If the 3-D renderings are similar to your vision of the project, with your approval we will begin putting an estimate together. After the draft and the estimate is accepted, we will need to get the measurement drawings in your hands for final design and for your subcontractors. To do this, we require a minimal deposit that is put towards your project. The average deposit is between \$300 to 10% of the project. This allows us to send you all the CAD, Measurement, and 3-D renderings of your complete project. This will also allow you to get full access to our resources in making the changes in finalizing your design.

During this portion of the process in most multi-cabinet projects, we will need on site measurements. If we have not done so already, we will want to come out to your home and verify the information.

After the final changes and the review of the new design with you and your contractor, we will be confident that all the design perspectives meet your customized specifications and we will place your project on a Production line schedule.

At this point we will start the process on our end to complete the production of your project on the date that we agree upon.

Lets Begin.
