How to measure your space for custom cabinets

A guide to planning and creating spaces for your home.

1.

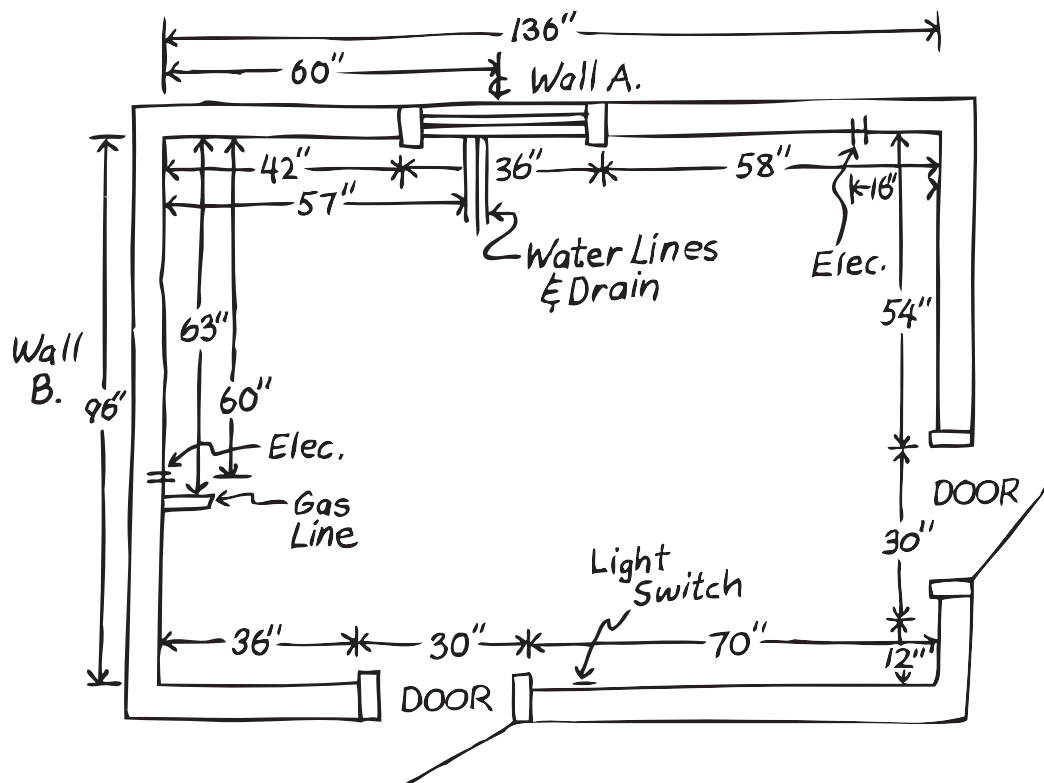

Measure your Space

Accurate measurements as detailed in this packet are the key elements that we will need to create a plan for your space. With this information, our cabinet designers will be able to create a well thought out, executed plan for your home!

Create a Floor Plan

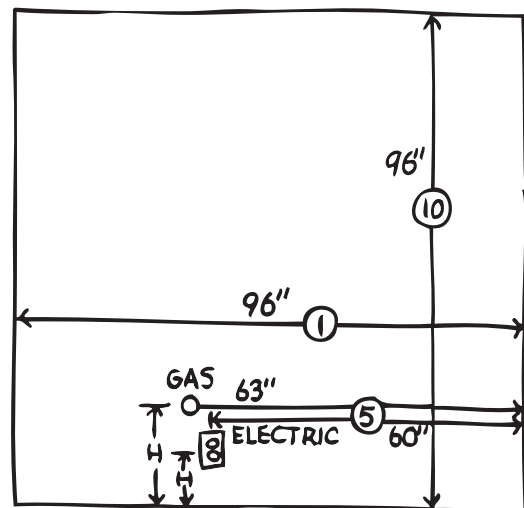

Before any planning can start we will need to know the dimensions of your space. By following the **measuring procedures** detailed on the next page, you can prepare a floor plan of your existing space.

After all your measuring is completed, your floor plan should resemble the diagram show below. Make sure you detail where all the doors, windows, hood vents, exhaust, gas lines, water lines, drains, switches, outlets, light fixtures and heat vents.

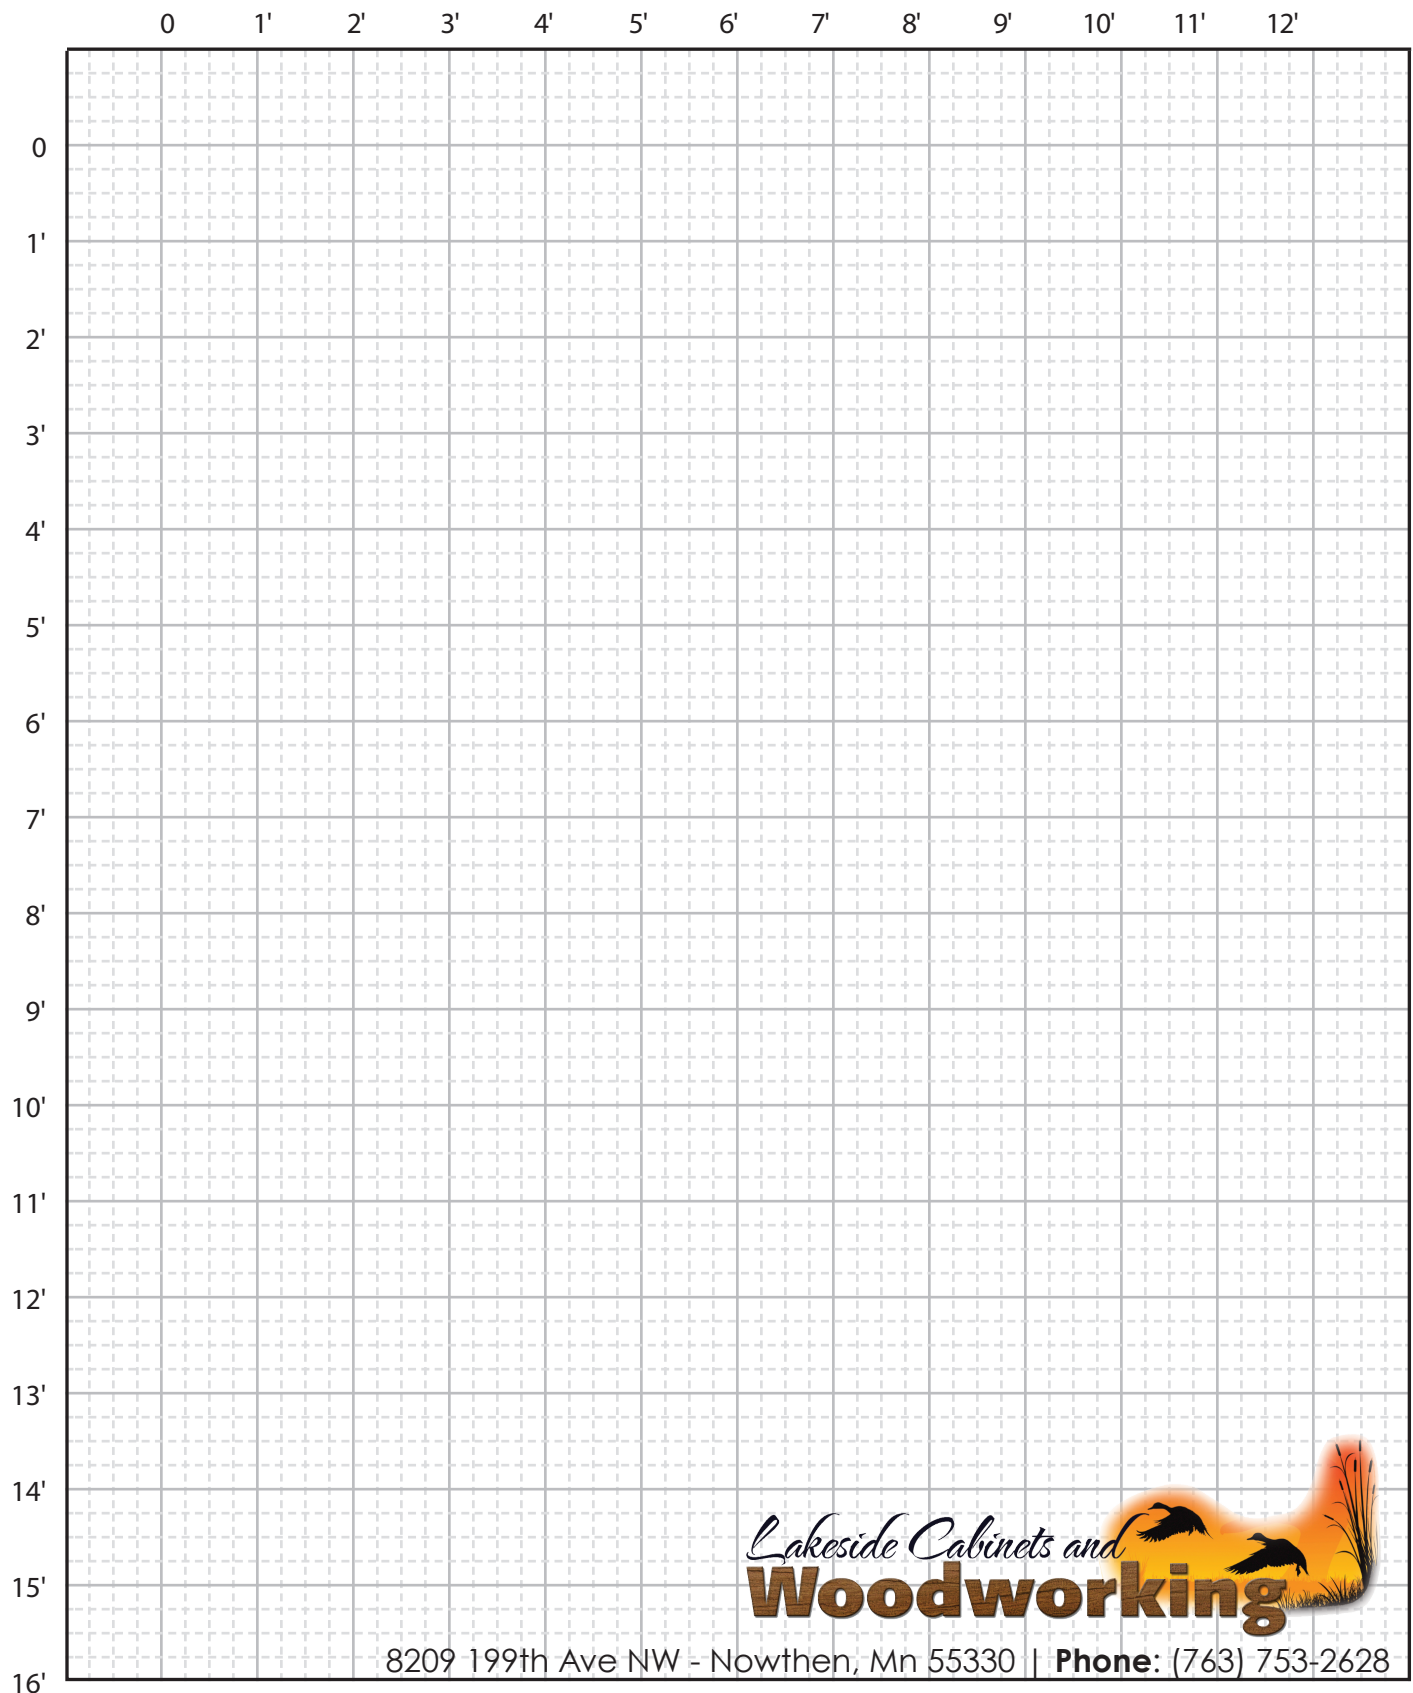

Using a tape measure and the included graph paper, measure the following:

4. Mark the location of the water, drain, gas lines and electrical outlets and switches on floor plan drawing.
5. Measure appliance openings and detail their location. Also measure the appliances as well.

Floor Plan Grid

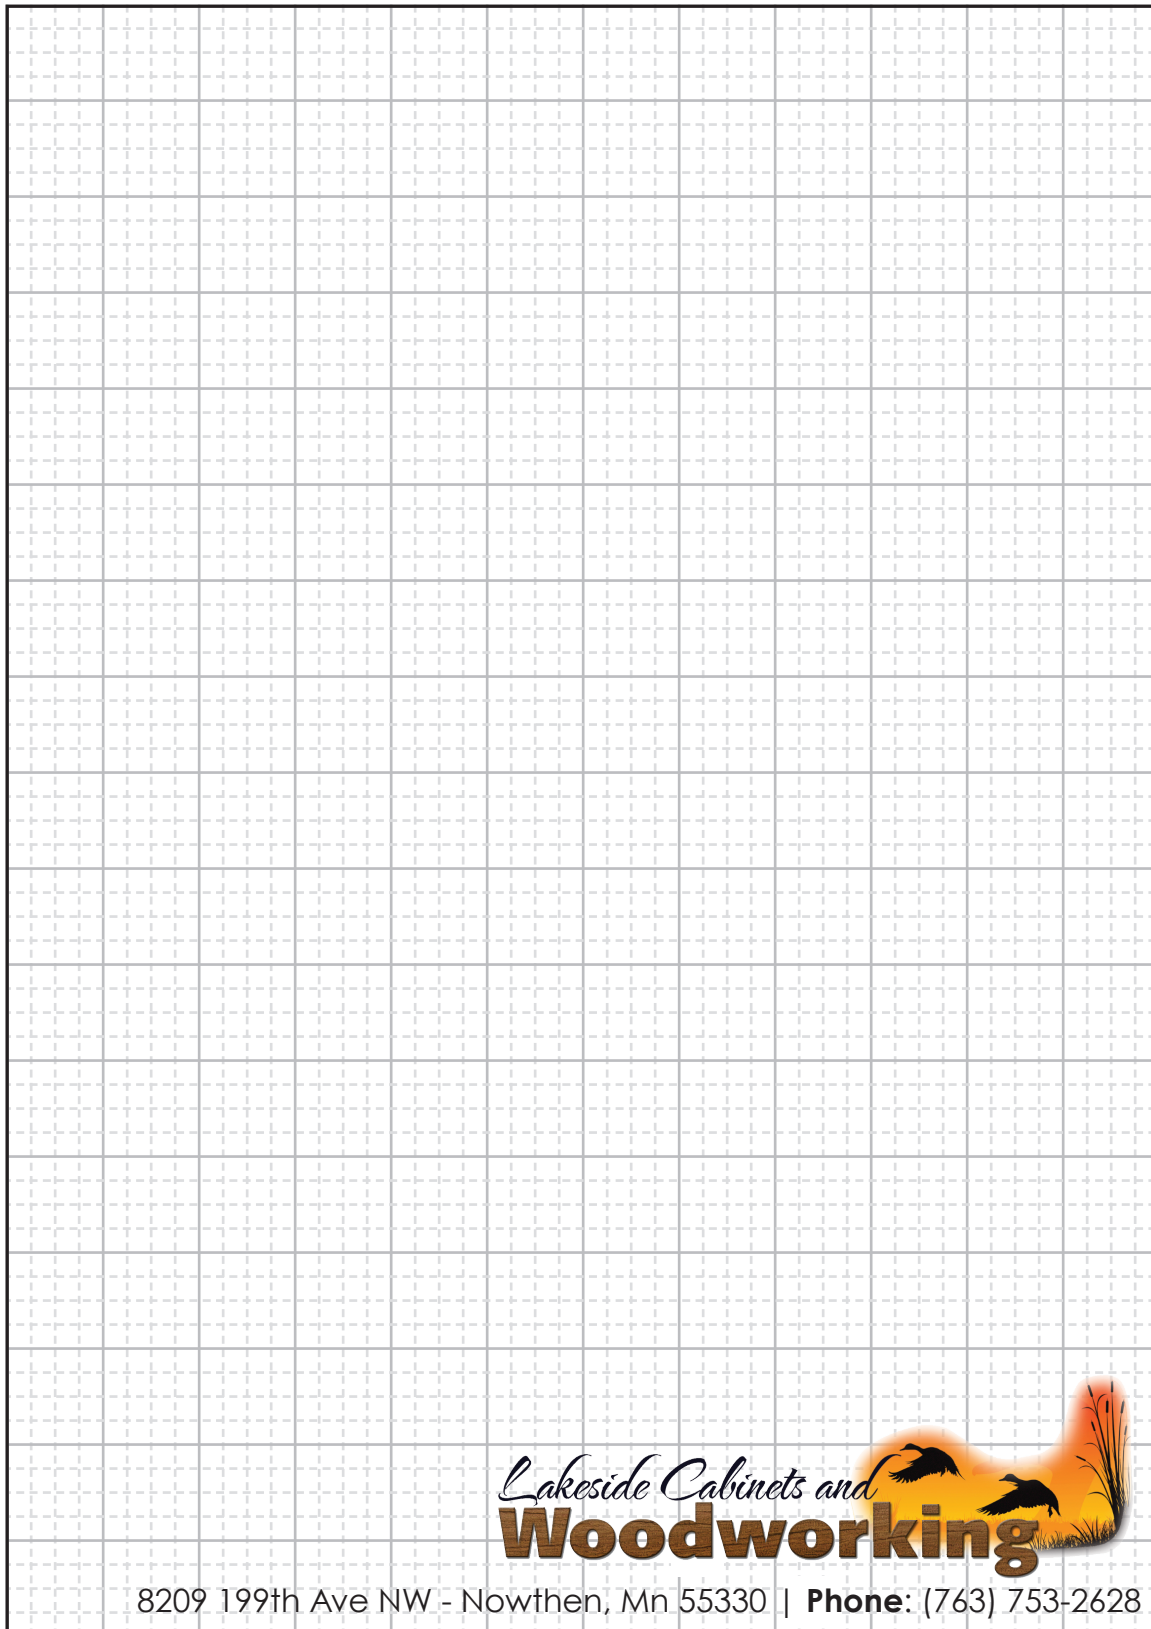

After all measurements are completed you can begin drawing your kitchen layout using the grid below. Each large square represents 1 square foot and the small squares are 3". Keep your drawing simple like the example floor plan.

Extra Floor Plan Grid

If you happen to have a larger space, use this extra sheet of grid paper to extend your drawing. Line this page up against the other grid paper to create a larger drawing.

13' 14' 15' 16' 17' 18' 19' 20' 21' 22' 23' 24' 25'

2.

Appliances & Fixtures

Show desired locations of appliances on drawing. It is very important to indicate and note the location for gas lines, electrical outlets and any wall mount telephone or cable TV locations.

	Type	Size W x D x H	Hinge Position L/R (Facing Appliance)

- Sink Floor Drip Tray
- Deluxe Soft-Close Shelf Trays
- Utility Trays
- Cutlery Divider
- Lazy Susan in Wall Corner Cabinet
- Country Valance
- Base Knick Knack Shelf
- Peninsula Base Knick Knack Shelf

3.

Now for Design

Now that you have completed your measurements and drawings, we would love to see them! Send us your information so that we can start to prepare a 3D rendering, of your project, for your review and approval!

This will give you the opportunity to see your space in vivid detail before spending a dime! Once the images and your estimate is approved, then we can discuss style details, functional options, special additions, your desired budget and time frame!
