INTRODUCING OUR SUPERIOR

HDF DOORS

OUR HIGH GRADE COMPOSITE MATERIAL IS NOT ONLY ENGINEERED TO PERFORM BETTER THAN SOLID WOOD IN HEAT AND HUMIDITY, BUT NOW IT IS MORE COST EFFECTIVE!

WHAT IS THE DIFFERENCE? SOLID WOOD DOORS ARE CONSTRUCTED OF FIVE PIECES, ALL JOINING TOGETHER. WITH HEAT AND HUMIDITY THE CENTER PANEL HAS THE ABILITY TO FOLAT INBETWEEN THE FRAME AND COULD CAUSE HAIRLINE FRACTURES. SINCE WOOD DOORS CONTRACT AND EXPAND BOTH VERTICALLY AND HORO-ZONTITLY, THIS REQUIRES A HIGHER LEVEL OF CARE.

BEING MORE STABLE THAN SOLID WOOD, **OUR HDF DOORS** ARE CONSTRUCTED TO LOOK AUTHENTIC, DESIGNED WITH STILE AND RAIL YOU WILL RECEIVE NOT ONLY THE SUPERIOR LOOK BUT ALSO YOU WILL HAVE THE BENEFIT OF A SOLID PIECE DOOR. THIS RESULTS IN CRISP, CLEAN LINES AND SMOOTH DOOR PANELS.

OUR HDF MATERIAL IS VERY DENSE, PROVIDING MDF DOORS WITH A SOLID SWING WEIGHT THAT EXUDES QUALITY. THESE CHARACTERISTICS DISTINGUISH OUR MDF DOORS FROM OTHER PAINTABLE DOORS THAT ARE MOLDED OR ROUTED.

"THEY JUST DON'T SHOW THE DETAIL THAT OURS DO."

WITH OVER 35 PROFILE AND EDGE OPTIONS TO MIX AND MATCH, YOU CAN CREATE THE CUSTOM CABINETS YOU HAVE BEEN DREAMING OF!
