Bread Board Maintenance

This Handout is to ensure your custom bread board lasts for years to come. Your new Bread Board is just like every other wood product, and it needs to be protected from changes in temperature and Humidity. Below you will find tips to protect your new Bread Board.

1. Your Bread Board is treated with Boos Butcher Block oil before it leaves Lakeside Cabinets & Woodworking.
2. The Bread Board needs to be treated twice a month or more often if it becomes dry.
3. The Bread Board needs to be treated on both sides.

By following these steps, you will prevent your bread board from warping and cracking.

Thank you.
